Examination format
The KAPS Exam is delivered by computer via Pearson VUE.
- It consists of two multiple-choice question papers, covering theory and practice.
- You must complete each exam paper within 2 hours, i.e., 4 hours in total for both papers.
- Each paper consists of 100 questions.
- Each question contains a stem (a question, phrase or short paragraph) and 4 possible answers.
- There is only one correct answer for each question.
- Candidates attempting both paper 1 and paper 2 must sit both papers on the same exam day. Candidates are allowed a break of up to 1 hour between the papers.

Examination subject areas
The KAPS Exam covers the following four domains:
- Domain 1: Pharmaceutics
- Domain 2: Therapeutics
- Domain 3: Pharmaceutical Chemistry
- Domain 4: Pharmacology and Physiology

There are two papers of each KAPS Exam:
- Paper 1: Pharmaceutical Chemistry, Pharmacology and Physiology
- Paper 2: Pharmaceutics and Therapeutics

Examination question types
Questions may either stand-alone or be associated with a patient profile. Stand-alone questions are those questions that are self-contained. Candidates will be given all the information required to answer the question.

Patient profile questions are 2 to 5 questions that are linked to content found in a patient record or profile. The patient profile will provide candidates with basic information about the patient (e.g. age, weight, allergies) and also more detailed information like a presenting complaint(s), any test results and the medication history.

Patient profile questions should be answered within the context of the profile. The answer to a question in the profile will not be dependent upon correctly answering another question. Candidates will be able to answer each question independently of other associated questions.
